

The Texas Landowner Incentive Program (LIP) offers funding opportunities designed to assist private landowners wishing to implement natural resource conservation practices on their lands. As the vast majority of Texas lies in private hands, so to does the opportunity and responsibility for good conservation stewardship.

# LANDOWNER INCENTIVE PROGRAM

As a program, LIP efforts are focused on projects aimed at creating, restoring, protecting and enhancing habitat for rare or at-risk species throughout the state, as well as activities that positively impact our valuable riparian areas and watersheds.

Through various funding partnerships, the program is able to offer 75:25 project cost-sharing with private landowners on LIP projects. This means that while TPWD will cover up to 75 percent of the proposed project costs, a landowner is expected to contribute a minimum of 25 percent through various forms of match (in-kind labor, materials, monetary, etc.).

Projects showing the greatest benefit to targeted species receive priority, as do projects offering long-term protection, long-term monitoring and greater than 25 percent landowner contribution. This program has no acreage restrictions.
