

PRIMARY USE: Reduction of solid and liquid pollutants in stormwater runoff.
ADDITIONAL USES: Encourages recycling of waste materials.

PROTECTING STORM DRAINS FROM HAZARDOUS WASTE DEPOSITIONS

What is it? A non-structural practice to reduce pollutant content in stormwater.

Purpose

Stormwater control and conveyance structures can be inviting waste deposit sinks for some individuals. Informing the public about the outlet location of the drainage system may increase awareness and help to decrease this behavior.

**Storm Drain that Drains to Local Surface Waters
Perspective View**

Limitations

Depends upon voluntary compliance. Message must be clearly legible.

Materials

This is a non-structural practice.

Installation

A stencil may be used for painting the message adjacent to a drain. Concrete walks may be stamped with the message, and tiles may be integral in the design of the curb and drain system.
